EXPERIENCE

Capital One - McLean, VA | January 2022 – February 2025

Full-stack developer

- Developed multiple responsive web applications depending on client's needs.
- Utilized JavaScript frameworks and libraries that support high quality web development projects – e.g., React.js, Vue.js, Redux, etc.
- Developed and maintained backend systems that use MySQL and AWS RDS.
- Performed functional, and non-functional testing on applications using automated and manual methods.

T-Mobile - Bellevue, WA | January 2020 – September 2021

Software Developer

- Applied testing frameworks and DevOps tools – e.g., Git, Azure, SonarQube, etc.
- Collaborated on all aspects of application development: feature implementation, UI/UX improvement, documentation, deployment, and testing.
- Developed responsive, high-performance web applications using React, JavaScript, HTML, and CSS.

PROJECTS

Dexter: New Blood - <https://dexter-new-johncervantesprotonmailcs-projects.vercel.app/>

- Created a fan-made website that is intended to promote Dexter: New Blood and the original Dexter TV series.
- Technologies: Next.js, GraphQL, Tailwind CSS, MongoDB, and AWS S3.

Hacker's Island

- Developed an educational video game that teaches the players how they can protect their anonymity and personal data against common cyberattacks.
- Technologies: C# and Unity.

Posi News

- Developed a mobile application that uses artificial intelligence to automatically curate and summarize positive or uplifting news for users.
- Technologies: React native, Node.js, Claude, Supabase

TECHNICAL SKILLS

Programming Languages: JavaScript, Python, TypeScript, SQL

Other: AWS, Node.js, Linux, Git, Jest, PostgreSQL, Docker

EDUCATION

Northeastern Illinois University - Chicago, Illinois

Bachelor of Computer Science | May 2018
